EE P 595A: Foundations and Applications of TinyML

Spring 2023

Dept. of Electrical and Computer Engineering

University of Washington

Instructor: Prof. Radha Poovendran (rp3@uw.edu)

ELECTRICAL & COMPUTER ENGINEERING

UNIVERSITY *of* WASHINGTON

Foundations and Applications of TinyML

- **TinyML:** Emerging area where **ultra large powerful ML models are converted into executables for embedded systems** that are battery operated and mostly well beyond the operation capacity of the smart phones (e.g., microcontrollers)

ELECTRICAL & COMPUTER ENGINEERING
UNIVERSITY *of* WASHINGTON

Foundations and Applications of TinyML

- TinyML is **real-time processing of time-series data that comes directly from sensors**

Foundations and Applications of TinyML

- TinyML has **applications in agriculture, health, retail, energy industry**, and more...

Foundations and Applications of TinyML

- **One of the first courses to bring ML, embedded systems, and IoT together**

- First two weeks of classes will cover **Fundamentals of ML/TinyML**

- From week 3 – week 9, we will study **one real-word TinyML application per class**. Each problem will have a real-world dataset to work on

- From week 3 – week 9, **first half** of each class will focus on the **needed background of the real-world application** to be studied that week. The **second half** is on learning to **train ML model, deploy TinyML model, and test the performance**

- All labs use **Python and C for coding**, and **we will provide needed modules** and also **work with the students during the labs**

ENGINEERING
UNIVERSITY *of* WASHINGTON
Foundations and Applications of TinyML

- What you will learn:

  - How to **deploy TinyML models on power and performance-constraint devices to solve real-word problems**

  - How to **implement machine learning algorithms** such as k-means clustering, regression, classification, and ensemble learning methods

  - How to **use Python libraries** - NumPy, Pandas, Seaborn, and Scikit-learn

  - Using **TensorFlow for deep learning** and **TensorFlow Lite (TFLite) for TinyML**

  - Using **C language for deploying TinyML on Embedded Systems**

  - How to **measure the performance** of the deployed TinyML models

  - How to efficiently and effectively run TinyML

- **Course Grade will be based upon homework/projects (45%) and a final project (55%))**

Foundations and Applications of TinyML

Resources:

- **Textbooks**:
  - **TinyML: Machine Learning with TensorFlow Lite on Arduino and Ultra-Low-Power Microcontrollers** 1st Edition by Pete Warden and Daniel Situnayake
  - **TinyML Cookbook** by Gian Marco Lodice

- **Free Online Material**:
 - **TinyML Foundation**: https://www.tinyml.org
  - **Cainvas Platform**: https://cainvas.ai-tech.systems/gallery/

- **Software and Hardware**:
  - **TensorFlow Lite**: https://www.tensorflow.org/lite
  - Tiny Machine Learning Kit Arduino (~$60)

Course Summary: Topics Covered

- **Week 1: Introduction to TinyML**
  - TinyML Landscape and Related Statistics
  - TinyML Applications
  - TinyML Challenges
  - Introduction to Software and Hardware Used in the Course

- **Week 2: Fundamentals of ML and TinyML**
  - Background on ML: Curve Fitting, Prediction, Overfitting vs. Underfitting
  - Background on Neural Networks: DNNs, CNNs, Dataset Split (Train, Test, and Validation)
  - TinyML Lifecycle and Workflow
  - Quantization Aware Training (QAT) and Post Training Quantization (PTQ)
  - Tiny Deep Learning
  - TensorFlow Lite (TFLite) for TinyML

Course Summary: Topics Covered

- **Week 3: TinyML for Keyword Spotting**
  - Background on Keyword Spotting and Streaming Audio
  - Challenges and Constraints in Keyword Spotting
  - Keyword Spotting Architecture and Data Collection
  - Model Training, Evaluation Metrics, and Deployment

- **Week 4: TinyML for Visual Wake Words**
  - Introduction to Visual Wake Words and Its Challenges
  - Visual Wake Words Dataset
  - MobileNets
  - Transfer Learning for Visual Wake Words
  - Model Training, Evaluation Metrics, and Deployment

ELECTRICAL & COMPUTER
ENGINEERING
UNIVERSITY *of* WASHINGTON

NSL

Course Summary: Topics Covered

- **Week 5: TinyML for Anomaly Detection**
  - Background on Anomaly Detection and Signal Processing
  - Real and Synthetic Datasets
  - Unsupervised Learning (K-Means Clustering and Autoencorders)
  - Threshold Choice
  - Model Training, Evaluation Metrics, and Deployment

- **Week 6: Robust navigation with TinyCNN**
  - Background on robust low power autonomous driving and challenges
  - Closed loop learning system via Imitation Learning
  - TinyML Approach to replace conventional CVA by CNN
  - Data collection and modeling
  - Model Training, Evaluation Metrics, and Deployment

ELECTRICAL & COMPUTER
ENGINEERING
UNIVERSITY *of* WASHINGTON

Course Summary: Topics Covered

- **Week 7: TinyML for Predictive Maintenance**
  - Background on Predictive Maintenance Solutions and Industry Applications
  - Sensors, Sensor Data, and Interface
  - Accelerometer, Gyroscope, Barometer, and Magnetometer
  - TinyML Framework for Predictive Maintenance
  - Model Training, Evaluation Metrics, and Deployment

- **Week 8: TinyML for American Sign Language (ASL) Interpretation**
  - Background on ASL and ASL Interpretation
  - Gesture Motion Datasets and Features
  - Analyzing Gesture Motion Data using Neural Networks
  - TinyML Framework for ASL Interpretation
  - Model Training, Evaluation Metrics, and Deployment

ELECTRICAL & COMPUTER ENGINEERING
UNIVERSITY *of* WASHINGTON

Course Summary: Topics Covered

- **Week 9: Smart Lock Recognition using TinyML**
  - Audio classification for deploying sensitive smart lock model
  - Data processing on audio data
  - Generate, train, and test a TensorFlow model using the SensiML Python SDK
  - Compile and flash the model to the edge device and display the inferred classes in the SensiML Open Gateway user interface

- **Week 10: Final Project Presentations**
  - **Each Group has 12 minutes (Suggested presentation – 9 minutes; Q&A— 3 mins)**
  - **Signup for the presentation order (Same as the project signup)**

- **Final report due on June 7th 11:59pm, 2023**
